A. W. Patterson
University of Toronto

Dear Sir,

I can see no objection to you announcing my appointment as Professor of Physiology in the Toronto newspapers. I do not quite know what information you desire but you can probably find it in the following:

Born near Dunkeld Scotland 1876 — father Rev. Robert Macleod. — Educated Grammar School Aberdeen — entered Marischal College of Aberdeen University 1893 — awarded Fyfe-Jamieson Gold Medal in Anatomy 1895 — & Matthews-Duncan Gold Medal in Obstetrics 1897 — graduated M.B. Ch.B. (with Honours) 1898 — awarded Anderson travelling Scholarship 1898-1900. Studied in Physiological Institute Leipzig 1898-1899. — Demonstrator in Physiology London Hospital Medical School (University of London) 1900 — awarded Mackinnon Scholarship 1903 Student's Lab. of the Royal Society 1901½ — Examiner in Physiology, Aberdeen University 1901-1903 — D.P.H. (diploma in public health) Cambridge University 1902 — Lecturer in Biochemistry, London Hospital 1903 — Professor of Physiology, Western Reserve University, Cleveland 1903 —

1918
1902
16

I am a member of: the Physiological Society of London; the American Physiological Society; the Society of Biological Chemists; the Society of Experimental Biology & Medicine; the American Association for the

Advancement of Science (was Chairman of Section K (Physiology) in 1913); Honorary Member of the Harvey Society &c

I am a member of the Council of the American Physiological Society and was a collaborator on the editorial staff of the Journal of Biological Chemistry, and the Journal of Laboratory and Clinical Medicine and Physiological Abstracts.

I am author of: Diabetes (in Physiological Pathology (E. Arnold London 1913); & joint author of:— Practical Physiology (E. Arnold, 1902); Organic Chemistry Wiley, New York 1907); Recent Advances in Physiology E. Arnold 1906); Physiology for Dental Students (C.V. Mosby Co. 1915); Fundamentals of Human Physiology (C.V. Mosby Co. 1916)

My researches have been on the following subjects:—

1900 to Phosphorus in Muscle, published in Zeitschrift of physiol. Chem.

1902 Cerebral vaso motor nerves (with Leonard Hill) published in Journ of Physiol.

1901–1903 — Investigations on the cause of Compressed air sickness &c. (with Leonard Hill) — Journ. of Physiology and Journal of Hygiene

1903–1905 — The cis-chemistry of Carbamates (with H.D. Haskins) in Journ. of Biol. Chem. and Am. Journ. of Physiol.

1905–1917 — Carbohydrate metabolism &c. about 20 papers at various times in many in Am. Journ. of Physiology (some with R.G. Pearce)

1914 — Blood flow through the Liver (with R.G. Pearce) Am. Journ. Physiol.

1918. — The significance of lactic acid in metabolism in Am. Journ of Physiol. &c.

Yours very truly

J.J.R. Macleod.

10 July 1918

Sir Robert Falconer

Dear Sir Robert:

Robinson turned up this morning and I have gone over the work he is to do during my absence in Cleveland. There are however certain details regarding his appointment here about which I am sorry I must trouble you. In the first place he did not know that he was to be released from the army to resume his old work, having been instructed to report at headquarters here about July 25th till when he is on furlough. To make certain that he is not ~~kept~~ put to some military duty here (it is Kipps 'hanging around' - excuse the expression - I know Miss Patterson your secretary who is to get in touch with headquarters. If you think that a personal note from you to Col. Ryerson would make things certain would you please send it. If R. does not begin his work here very soon I will be quite unprepared for next winter's

work. He impresses me very favourably except that he is not, there was, a carpenter

The second point is with regard to his salary. I saw Mr Moore this morning & he told me that you had written & say that R's salary should be the old one & start with & that is could be readjusted — the autumn. Unfortunately I told R. that his salary was to be $1100 per year — for I so understood — and I would recommend that he be given this from the start of his appointment, which is with start as from July 15th unless the military authorities fail to release him. If you approve of this would you please write Mr Moore. If you do not think it wise to start with the $1200 would you write me & will explain matters to Robinson by letter

I leave for Cleveland this afternoon & I with hope to be able to make the permanent 'plotting' in about a month

With sincere regard

Yours

Yours very truly

J. J. R. Macleod.

P.S. I may say that Robinson is to do some work in the Laboratory while he is still on furlough

TORONTO, CANADA

DEPARTMENT OF PHYSIOLOGY

19 May 1909

Dear Sir Robert:

I do not believe that we will require any assistance for Mr Frisby as tutor in Expression for the first year medical students. It will of course depend on the size of the classes but that we cannot estimate with any accuracy at the present time. I am therefore returning the enclosed letter with apologies for retaining it so long

Yours Sincerely
J J R Macleod

15

May 21st, 1919

Professor J. J. R. Macleod,

University of Toronto.

Dear Dr. Macleod:

Owing to my absence from the city and the indisposition of the Nurser there will be no meeting of the Board to-morrow. However, I have spoken to the Chairman, Dr. Bask, and told him that I was going to take the responsibility of authorising you to tell Dr. Redfield that he will be appointed Assistant Professor of Physiology from the first of July, 1919, at a salary of $2700. The first payment will be made on the 15th of July. The appointment cannot be made by the Board until at the earliest a week from to-day, but he can rely on this appointment. At the same time I am very glad that we are going to secure his services.

I have just had a letter from Dr. Sabin intimating his deep appreciation of the suggestion that he should come to Toronto for the Chair of Biochemistry, but saying that there is no possibility of his being able to accept the proposal.

Yours sincerely,

President.
